SUMMARY

At BWG Foods, I work across C#, ASP.NET Core, SQL Server, authentication, and delivery pipelines. I also bring Java Spring Boot, React, Kafka, and PostgreSQL experience from General Motors and my own full-stack projects.

EXPERIENCE

BWG Foods UC
Sep 2026 - Present

Junior Full Stack Engineer — Dublin

- Develop ShopLinkPOS retailer and administration workflows with C#, ASP.NET Core MVC, Razor, and SQL Server.
- Build Playwright for .NET and xUnit coverage with Azure DevOps pull-request validation and CI pipelines.
- Improve SSO, permission-aware navigation, and production workflows; partner with QA to validate fixes.

BWG Foods UC
May 2026 - Sep 2026

Full Stack Developer Intern — Dublin

- Delivered ShopLinkPOS event registration, document management, and retailer content-publishing features.
- Upgraded a .NET MAUI application from .NET 8 to .NET 10 for Android and iOS.
- Contributed to Just Eat Q-commerce integration, consent-management migration, analytics, database updates, and UAT fixes.

Irish national squad
2024 - 2026

Full-time Judo Athlete — International

- Represented Ireland as a full-time athlete after graduation, travelling for training and competition across Europe, Japan, and Canada.

General Motors
Jan 2023 - May 2024

Software Engineer Intern / Part-Time — Dublin

- Built Java Spring Boot REST and data-sync workflows using PostgreSQL, JPA/Hibernate, and external APIs.
- Implemented and debugged Kafka producers, consumers, failure scenarios, and service tests.
- Created React screens with Ant Design and Azure AD/MSAL authentication for an internal application.

SELECTED PROJECTS

Crypto Portfolio Tracker
github.com/kevinasramoska/crypto-portfolio-app

- Atomic ledger replay keeps holdings and realised P/L consistent after transaction corrections.
- JWT authentication, per-user data boundaries, rate limits, and production secret validation protect the API.

RentRight Property Management
github.com/kevinasramoska/RentRight

- React and TypeScript workspaces share one ASP.NET Core host with Identity account screens.
- Resource-level authorization, immutable maintenance history, and concurrency checks protect rental workflows.

TECHNICAL SKILLS

Languages
C#, Java, TypeScript, JavaScript, SQL

Frameworks
ASP.NET Core MVC, Razor, .NET MAUI, Spring Boot, React, Next.js

Data
SQL Server, PostgreSQL, EF Core, JPA/Hibernate, Flyway

Testing
Playwright, xUnit, JUnit, Mockito, MockMvc, Testcontainers

Delivery
Azure DevOps, GitHub Actions, Docker, CI/CD

Integration
REST APIs, Kafka, authentication, authorization, SSO

EDUCATION & CERTIFICATION

Maynooth University - BSc Computer Science & Software Engineering **2020 - 2024**

Microsoft Azure Fundamentals (AZ-900) **February 2023**
