PROFESSIONAL SUMMARY

Full-stack software engineer delivering C#/.NET business applications at BWG Foods and Java Spring Boot connected-vehicle services at General Motors. Experience across REST APIs, SQL databases, Kafka, authentication/SSO, automated testing and CI/CD, with full-stack and cross-platform mobile development.

EXPERIENCE

BWG Foods UC — **Dublin · Hybrid**
Junior Full Stack Engineer · Full-time — Sep 2026 – Present
Full Stack Developer Intern — May 2026 – Sep 2026

- Develop and maintain ShopLinkPOS retailer/admin applications using C#, ASP.NET Core MVC/Razor and SQL Server; delivered event registration, document-management and content-publishing functionality.
- Built Playwright for .NET / xUnit end-to-end tests and xUnit unit tests; configured Azure DevOps pull-request validation and CI pipelines for legacy ColdFusion applications.
- Implemented authentication and workflow improvements including SSO routing, permission-aware navigation, input validation and audit logging.
- Upgraded a .NET MAUI application from .NET 8 to .NET 10 for Android and iOS.
- Contributed to Just Eat Q-commerce product mappings, EF Core/database migrations, diagnostic logging, age-restricted tags and UAT defect fixes.
- Migrated consent management from OneTrust to PrivacyEngine Consent Manager and integrated GA4 across seven BWG web projects.

General Motors — **Dublin**
Software Engineer Intern / Part-time — Jan 2023 – May 2024

- Developed Java Spring Boot REST/data-sync functionality for connected-vehicle SIM profile and lifecycle workflows, using PostgreSQL, JPA/Hibernate and external API integrations.
- Implemented and debugged Kafka producer/consumer workflows, event handling and failure scenarios; tested backend services and messaging with JUnit, Mockito and WireMock.
- Created React/JavaScript screens for an internal application with Ant Design and Azure AD/MSAL authentication; collaborated through Git, pull requests and Agile delivery.

TECHNICAL SKILLS

Languages: C#, Java, TypeScript, JavaScript, SQL
Backend & data: ASP.NET Core MVC, Spring Boot, REST APIs, EF Core, JPA/Hibernate, SQL Server, PostgreSQL, Kafka
Frontend & mobile: React, Next.js, Razor, Blazor, .NET MAUI
Testing & delivery: Playwright, xUnit, JUnit, Mockito, WireMock, Testcontainers, Azure DevOps/Pipelines, Git, CI/CD, Docker
Security & tools: SSO, Azure AD/MSAL, JWT, GitHub Actions, Kiro, Codex

PROJECTS

Crypto Portfolio Tracker | Java, Spring Boot, PostgreSQL, React/TypeScript

- Developed a full-stack portfolio platform with JWT-secured REST APIs, Docker, transaction workflows, Vitest/JUnit/Testcontainers tests and GitHub Actions CI; implemented historical transaction correction with validation.

RentRight | ASP.NET Core MVC, EF Core, SQL Server

- Built role-based Admin/Landlord/Tenant workflows with ASP.NET Core Identity and a versioned OpenAPI REST API supporting pagination, authorization and xUnit tests.

EDUCATION & CERTIFICATION

Maynooth University — BSc Computer Science & Software Engineering — 2020 – 2024
Microsoft Azure Fundamentals (AZ-900) — Microsoft, 2023
