Summary

Backend Software Engineer experienced in Java and Spring Boot microservice development. At General Motors, developed REST APIs and Kafka-based services supporting distributed vehicle platform systems. Focused on building production-ready backend services using SQL, Docker, CI/CD, and automated testing.

Core Focus

Java Backend Development • Microservices • REST APIs • Distributed Systems

Skills

Languages	Frameworks	Databases	Cloud	🔧 Infrastructure
Java, TypeScript, JavaScript, Python	Spring Boot, React	MySQL, SQL Server, MongoDB, Elasticsearch	Azure (AZ-900 Certified)	Docker, Kafka, Git, ELK Stack

Experience

General Motors Dublin
Software Engineer (Part-Time) 09/2023 - 05/2024

- Developed Java Spring Boot backend services supporting enterprise vehicle platform systems.
- Built and maintained REST API functionality for service integration and backend communication.
- Contributed to Kafka-based microservices supporting asynchronous workflows in distributed systems.
- Worked with Kafka topics, producers, and consumers supporting event-driven microservices.
- Implemented ELK-based logging and monitoring to improve observability of distributed services.
- Wrote unit and integration tests using JUnit and Mockito to improve service reliability.
- Diagnosed backend issues through debugging, log analysis, and root-cause investigation.
- Contributed to Docker-based development workflows and CI/CD-related engineering tasks.
- Collaborated in an Agile engineering team through sprint planning, development, testing, and code reviews.

Software Engineer (Intern) 01/2023 - 09/2023

- Built React internal web application replacing legacy workflow platform.
- Implemented Azure AD authentication using Microsoft MSAL.
- Developed Spring Boot backend services integrating APIs with SQL repositories.
- Implemented backend logic to compare and synchronize API and database data.
- Added ELK logging and helped resolve Kafka producer/consumer issues.
- Implemented JUnit and Mockito tests improving service reliability.

Projects

Crypto Portfolio Tracker
Developed Spring Boot backend service for tracking cryptocurrency portfolios with REST APIs, MySQL persistence, and Docker deployment.
<https://github.com/kevinasramoska/crypto-portfolio-app>

Property Rental Management System
Full-stack property management system built with [ASP.NET](#) Core MVC and SQL Server with role-based authentication and Docker deployment.
