

Kevinas Ramoska

Backend Software Engineer | Java | Spring Boot | .NET | React

Kildare, Ireland +353 89 951 1136 kevinasramoska@gmail.com Portfolio LinkedIn GitHub

SUMMARY

Backend-focused software engineer with General Motors experience building Java and Spring Boot services, REST APIs, Kafka workflows, and React applications. Experienced with SQL data models, authentication, automated testing, Docker, CI/CD, and production diagnostics.

EXPERIENCE

General Motors

Sep 2023 - May 2024

Software Engineer (Part-Time)

Dublin, Ireland

- Developed Java and Spring Boot backend services, REST APIs, and Kafka messaging workflows for enterprise systems.
- Added JUnit and Mockito tests plus ELK logging and monitoring to improve service reliability and diagnosis.
- Investigated production issues through logs and root-cause analysis; contributed to Docker, CI/CD, code review, and Agile delivery.

General Motors

Jan 2023 - Sep 2023

Software Engineer Intern

Dublin, Ireland

- Built a React internal application that replaced a legacy workflow and implemented Azure AD authentication with Microsoft MSAL.
- Developed Spring Boot integrations with external APIs and SQL repositories, including backend data comparison and synchronisation logic.
- Added ELK logging, helped resolve Kafka producer/consumer issues, and tested service behaviour with JUnit and Mockito.

SELECTED PROJECTS

Crypto Portfolio Tracker

github.com/kevinasramoska/crypto-portfolio-app

- Built a Spring Boot/PostgreSQL transaction ledger with JWT security, Flyway migrations, market data, portfolio snapshots, and CSV export.
- Tested backend behaviour with JUnit, MockMvc, and PostgreSQL Testcontainers; built the frontend with Next.js, React, and TypeScript.

RentRight Property Management

github.com/kevinasramoska/RentRight

- Built an ASP.NET Core MVC application with Identity, Entity Framework Core, SQL Server, and role-specific Admin/Landlord/Tenant workflows.
- Implemented property, tenancy, and maintenance-request flows with access scoped to owned properties and active tenancies.

TECHNICAL SKILLS

Languages

Java, C#, TypeScript, JavaScript, SQL

Testing

JUnit, Mockito, MockMvc, Testcontainers, xUnit

Frameworks

Spring Boot, React, Next.js, ASP.NET Core MVC, JPA/Hibernate, EF Core

Platform

Docker, GitHub Actions, CI/CD, Azure, ELK, Kafka

Data

PostgreSQL, SQL Server, Flyway, relational modelling

Architecture

REST APIs, authentication, authorisation, event-driven workflows

EDUCATION & CERTIFICATION

Maynooth University - BSc Computer Science & Software Engineering

2020 - 2024

Microsoft Azure Fundamentals (AZ-900)

2023
