Kevinas Ramoska

Junior Full Stack Engineer at BWG Foods UC

Celbridge, Co. Kildare, Ireland +353 89 951 1136 kevinas530@gmail.com Portfolio LinkedIn GitHub

SUMMARY

Full stack engineer with commercial C#/.NET and Java/Spring Boot experience. Promoted from intern at BWG Foods, building ASP.NET Core and SQL Server portals for 206 stores; previously 17 months at General Motors on event-driven microservices with Kafka and Kubernetes.

EXPERIENCE

BWG Foods UC
Sep 2026 - Present

Junior Full Stack Engineer — Dublin

- Build ShopLinkPOS retailer and admin portals with ASP.NET Core MVC, Razor, EF Core and SQL Server for 206 stores (~500 users).
- Introduced 49 Playwright/.NET E2E tests and xUnit, plus 5 Azure DevOps PR-validation pipelines and main-to-dev branch pipelines for .NET and ColdFusion.
- Added SSO, permission-aware navigation and audit logging; resolved UAT issues with QA.

BWG Foods UC
May 2026 - Sep 2026

Full Stack Developer Intern — Dublin

- Upgraded the .NET MAUI Android/iOS app from .NET 8 to .NET 10.
- Migrated OneTrust to PrivacyEngine and GA4 across 7 websites; extended Just Eat Q-commerce for age-restricted items.

Irish National Judo Squad
2024 - 2026

Full-time Judo Athlete — Ireland

- Irish Senior Champion (2023); 7th at two Senior European Cups (+100 kg); competed across Europe, Japan, and Canada.

General Motors
Jan 2023 - May 2024

Software Engineer (Intern Jan 2023 - Sep 2023; Part-Time Sep 2023 - May 2024) — Dublin

- Delivered a full-stack internal app end to end for the Connected Vehicle Carrier Platform, replacing a legacy tool: React/Ant Design front end with Microsoft SSO (MSAL/Azure AD) and Python data-seeding scripts over a Spring Boot back end (OkHttp).
- The back end tracked SIM-data files that carriers dropped into AWS S3, compared MFTP transfer records from an external API and synced changes automatically; refactored into single-responsibility services with JUnit/Mockito tests.
- Part-time: built services, controllers, features and integration tests on an event-driven, distributed SIM-lifecycle platform (activation, deactivation): Kafka producer, consumer and trigger services with PostgreSQL on Kubernetes.
- Added ELK monitoring for activation events and Kafka messaging, and traced failing SIM requests across services with ELK and kubectl (logs, pod restarts).
- Shipped through Jenkins, SonarQube and pull-request reviews in SAFe (PI planning), with weekly sprint demos to two product owners.

SELECTED PROJECTS

Crypto Portfolio Tracker
github.com/kevinasramoska/crypto-portfolio-app

- Built a Java 25/Spring Boot 4 API with Next.js 16, React/TypeScript and PostgreSQL; secured authentication with JWT and migrations with Flyway.
- Designed an auditable BUY/SELL ledger with atomic replay, precise cost-basis/P&L and validation of historical corrections.
- Added market-price freshness, performance snapshots and CSV export, with JUnit, MockMvc, PostgreSQL Testcontainers, Vitest and CI.

RentRight Property Management
github.com/kevinasramoska/RentRight

- Built versioned tenancy/maintenance APIs with ASP.NET Core Identity and EF Core: ownership checks, CSRF protection, immutable history and concurrency controls.
- CI runs 596 .NET, 248 SQL integration and 91 frontend tests; Docker-based SQL workflows.

SKILLS

Programming
C#, Java, TypeScript, JavaScript, SQL, Python

Frontend & Mobile
React, Next.js, HTML5, CSS3, Razor, Blazor, .NET MAUI

Backend & APIs
ASP.NET Core MVC, REST APIs, OpenAPI, Spring Boot, Spring Security, JWT

Data & Persistence
SQL Server, PostgreSQL, EF Core, Spring Data JPA/Hibernate, Flyway, Kafka

Testing & Delivery
Playwright for .NET, xUnit, JUnit, Mockito, MockMvc, Testcontainers, SonarQube, Jenkins, Azure Pipelines, GitHub Actions, CI/CD

Tools & Security
Git, Azure DevOps, Docker, Kubernetes, AWS S3, IIS, ELK, Azure AD/MSAL, SSO, OAuth, Codex

Spoken Languages
English, Lithuanian

Practices
Agile/Scrum (SAFe), Code Review, SOLID, Change Management

EDUCATION & CERTIFICATION

Maynooth University - BSc Computer Science & Software Engineering **2020 - 2024**
Modules: Algorithms, Databases, Software Testing, Software Engineering, Team Project.

Microsoft Azure Fundamentals (AZ-900) **February 2023**
