SUMMARY

At BWG Foods, I work across C#, ASP.NET Core, SQL Server, authentication, and delivery pipelines. I also bring Java Spring Boot, React, Kafka, and PostgreSQL experience from General Motors and my own full-stack projects.

EXPERIENCE

BWG Foods UC
Sep 2026 - Present

Junior Full Stack Engineer — Dublin

- Develop and maintain ShopLinkPOS retailer and administration applications with C#, ASP.NET Core MVC, Razor, and SQL Server.
- Build Playwright for .NET end-to-end tests and xUnit unit tests, backed by Azure DevOps pull-request validation and CI pipelines.
- Improve single sign-on, permission-aware navigation, authentication, and production workflows while partnering with QA to validate fixes.

BWG Foods UC
May 2026 - Sep 2026

Full Stack Developer Intern — Dublin

- Delivered ShopLinkPOS features for event registration, document management, and retailer news and content publishing.
- Upgraded a cross-platform .NET MAUI application from .NET 8 to .NET 10 for Android and iOS.
- Contributed to Just Eat Q-commerce integration, consent-management migration, analytics changes, database updates, and UAT fixes.

General Motors
Jan 2023 - May 2024

Software Engineer Intern / Part-Time — Dublin

- Engineered Java Spring Boot REST and data-sync functionality using PostgreSQL, JPA/Hibernate, and external API integrations.
- Implemented and debugged Kafka producer and consumer workflows, message handling, failure scenarios, and service tests.
- Created React and JavaScript screens with Ant Design and Azure AD/MSAL authentication for an internal application.

SELECTED PROJECTS

Crypto Portfolio Tracker
github.com/kevinasramoska/crypto-portfolio-app

- Atomic ledger replay keeps holdings and realised P/L consistent after transaction corrections.
- JWT authentication, per-user data boundaries, rate limits, and production secret validation protect the API.

RentRight Property Management
github.com/kevinasramoska/RentRight

- ASP.NET Core Identity separates Admin, Landlord, and Tenant capabilities.
- Ownership and active-tenancy rules scope property and maintenance workflows.

TECHNICAL SKILLS

Languages
C#, Java, TypeScript, JavaScript, SQL

Frameworks
ASP.NET Core MVC, Razor, .NET MAUI, Spring Boot, React, Next.js

Data
SQL Server, PostgreSQL, EF Core, JPA/Hibernate, Flyway

Testing
Playwright, xUnit, JUnit, Mockito, MockMvc, Testcontainers

Delivery
Azure DevOps, GitHub Actions, Docker, CI/CD

Integration
REST APIs, Kafka, authentication, authorization, SSO

EDUCATION & CERTIFICATION

Maynooth University - BSc Computer Science & Software Engineering — **2020 - 2024**

Microsoft Azure Fundamentals (AZ-900) — **February 2023**
